

# Clay Earth Paint

Zero VOC

Economical, Flat Sheen, Interior paint, made with Georgia clay. Regionally sourced. Locally Manufactured. Very low odor. Comes in White for Ceilings or Walls.

Clay Earth Paint is a high quality yet affordable way to paint ceilings or walls without poison, vinyl or toxic additives. We make it from clay because we like the smell and the fact that the world's largest deposit of clay is close to us. It has a beautiful glow to it and clay has been known for centuries for its healing and toxin absorbing properties.

With less sheen than Clear Skies Matte, Clay Earth has the ability to hide more surface defects such as dry wall mud or touch up spots.

Can be custom tinted in the factory for orders over 200 gallons for a very economical earth friendly and painter friendly paint. This also gives extra comfort knowing every wall touched up with the paint will be the same color.
